

**It is important to continue handwashing in line with HSE advice**

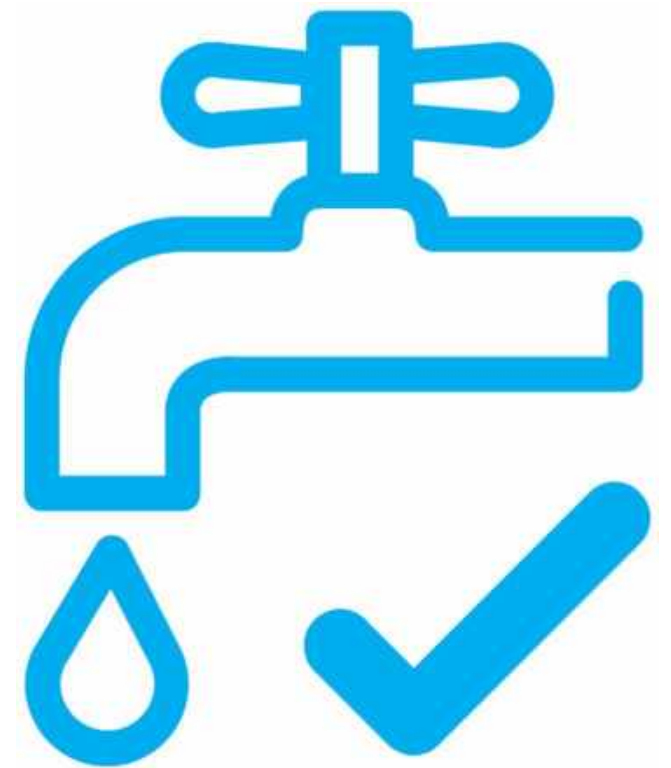

# Drinking water is a precious resource on Achill Island – please conserve!

To help conserve water on Achill Island we're asking **residents, businesses** and **visitors** to make every effort to reduce the amount of water we all use on the island

## Please help to conserve water:

- Remember to turn off taps after use
- Turn off water supply to vacant premises
- Check for and fix drips and leaks, especially in toilet cisterns
- Save and reuse collected water from baths, showers, hand basins
- Keep showers short and install water saving devices
- Use eco settings on appliances and wait for full loads
- Use a rose head watering can instead of a hose or sprinkler
- Report any leaks to Irish Water at 1850 278 278
